DESCRIPTION

The NOHMI'S high performance location lamp model FLP055D and FLP055D-W are used, but not limited to, for notifying occupants of the location of a manual fire alarm box. The location lamp can be turned on and off with a short interval of time to indicate the hydrant pump starting by using together with the NOHMI Hydrant Pump Starter Relay Box.

The location lamp should be installed on the wall and

above a manual fire alarm box, and clearly be seen at a position within 10m apart from the location lamp. The location lamp is harmless to occupants since it does not use any fragile materials.

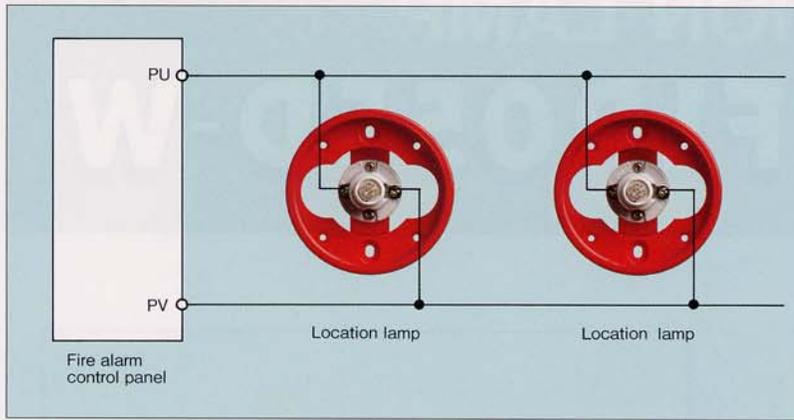

The location lamp is provided with a red L.E.D. lamp as a light source which has 5-light emitting diodes in it.
