

Addressable Multi Channel Interface DI-9309

Features and Benefits

1. Providing Max. 16 channels of independent input. 1-16 selectable. Input signals are insulated from the loop.
2. Providing two channels of independent dry contact output.
3. 3-18 consecutive addresses, changing with selected channel quantity.
4. Power supply monitored.
5. Cable monitored for open circuit and short circuit

Description

With microprocessor, DI-9309 Addressable Multi-Channel Interface can communicate with fire alarm control panel (FACP), monitor power supply, and judge the logic state of input signal, control output and state indicators.

Each output channel occupies an individual address and receives start command from FACP, energizes the related relay, gives dry contact output and lights the related action indicator. Each input is corresponded to an address to receive the state signal from the equipment and transmit it to FACP. The quantity of channels can be set by jumpers

Electronic addressing can be done through Handheld Programming tool (P-9910), purchased separately.

Technical Specifications

- Operating Voltage Loop voltage: 24V (16V~28V).
Power Supply Voltage: 24VDC (20VDC~28VDC).
- Standby Current Loop $\leq 1.5\text{mA}$ Power $\leq 50\text{mA}$
- Action Current Loop $\leq 3\text{mA}$ Power $\leq 100\text{mA}$
- Output Capacity Output contact capacity: 220V/2A.
- Output Type Dry contact output.
- Programming Method Electronically programming.
- Code Range Occupying 3-18 addresses, the output address of Channel 1 can be set within 1 225. The output address of Channel 2 is automatically increased 1 to Channel 1. The input address of Channel n is automatically increased n and 1 to Channel 1.
- Action Indicators Red. Separate polling indicator HL0. Individual state LED(n) for each channel input. Flashes in fault state. Illuminates in action state. Quiet in normal supervisory. HL1 and HL2 for each channel output. Illuminates when activated.
- Ambient Temperature $-10^{\circ}\text{C}+50^{\circ}\text{C}$
- Relative Humidity $\leq 95\%$, non condensing
- Mounting Hole 190mm \times 90mm
- Distance 200mm \times 100mm \times 20mm
- Dimensions (L \times W \times H)
- Weight About 240g

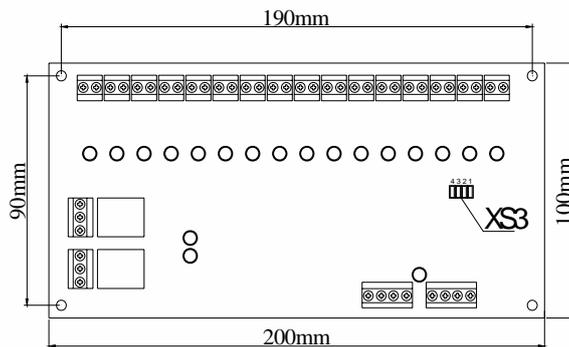

Addressable Multi Channel Interface

DI-9309

Mounting Module Base

The module should be installed in compliance with all local codes and/or NFPA 72 National Fire Alarm Code, NFPA 70 National Electrical Code, BS5389, and EN45. It is installed onto anE electrical box (not included).

Wiring and Connection

- Fig.2 shows the system connection with volt-free normally open input.

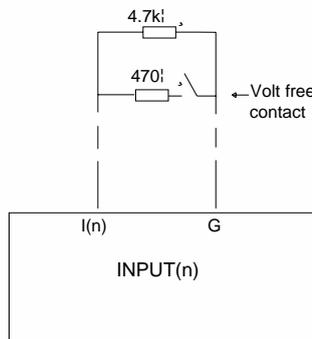

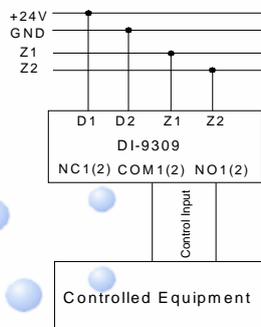

Fig. 2

- Fig.3 shows the system connection with dry contact output.

Programming

DI-9309 interface can be addressed in field with power off by using P-9910B programmer connected to Z1 and Z2. Please refer to P-9910B Hand Held Programmer Installation and Operation Manual for details.

Selection of compatible Control Panels

Compatible with all GST Intelligent Fire Alarm Panels GST 200, GST 5000, GST 9000.

Ordering Information:

Part No	Description	Weight/ Kg	Pack Qty per Box
DI-9309	Addressable Multi Channel interface Module (Electrical box excluded in the package)	.180	120
